

Techmark offers our Air Liner System for quality mushroom ventilation

AIR-LINER © TYPE L
Long symmetric injection pipe
Long reach; compact air stream
Standard type

AIR-LINER © TYPE M
Short symmetric injection pipe
Higher induction
Shorter reach; wider air stream

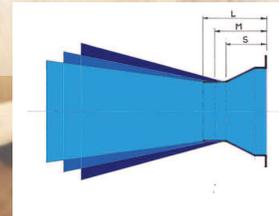

AIR-LINER © TYPE S
Symmetric injection nozzle without
injection pipe
Highest induction
Shortest reach; wide air stream

Air Liner System

Using Air Liners, Techmark can design an improved air system based upon your existing production rooms. Air Liners properly direct and divide the air stream to reduce scaling and other issues related to poor air flow patterns. Using our computer selection system and 3 Air Liner sizes, we can design the correct air distribution system for your farm.

Find out more at www.techmark-inc.com or call us at 517-322-0250. We can help you decide if the Air Liner is the right choice for your application.
